

Overview

Manifolds connecting well-control equipment and injection pumps for pumping kill fluid into the well, with isolation and check valves.

Construction and Configuration

The assembly comprises check valves, gate valves, pressure gauges and connecting lines. It is used with the choke manifold; valve and fitting pressure ratings must match.

Key Data

Item	Specification
Pressure rating	14、 21、 35、 70、 105 MPa

Selection

Specify the rated pressure, bore, injection requirements and connection to the blowout preventer.
