

Product & Technical Configuration

Overview

Used for reactions in chemical, pharmaceutical and food processes. Carbon steel, stainless steel, zirconium and nickel-based alloys can be selected for the fluids and operating conditions.

Technical Configuration

Item	Configuration
Brand	IKUSE
Processes	Vulcanization, nitration, hydrogenation, alkylation, polymerization and condensation
Material options	Carbon steel, low-alloy steel, stainless steel, zirconium, nickel-based alloys and clad plate
Nickel-based options	Hastelloy, Monel and heat-resistant Ni-Cr alloys
Configuration basis	Reaction process, fluids, temperature, pressure and heat transfer duty
