

Overview

Gate valves for shut-off service in drilling circulation and control pipework, with threaded or flanged ends.

Construction and Configuration

The series includes non-metallic and metallic sealing designs. Z23 and Z43 have different end connections and must be checked separately.

Key Data

Series	Size	Rated working pressure
Z23、 Z43	2"—4"	35 MPa

Selection

Specify the bore, working pressure, end connections, sealing requirements and fluid conditions.
