

Overview

Rods linking mud-pump power and fluid ends, with dimensions and threads matched to the pump model.

Construction and Configuration

Piston rods are forged from alloy structural steel, with blackening, zinc plating, nickel plating or chrome plating depending on configuration. Intermediate rods are one-piece alloy-steel forgings with precision-ground, chrome-plated surfaces.

Key Data

Compatible series	Connection size
F, 3NB and corresponding drilling-pump models	Metric or imperial, depending on pump model

Selection

Select by equipment model, pipe diameter, rated load or torque, and connection dimensions. Check each size within the same series separately.
