

Overview

Inline check valves allowing flow in the specified direction and closing against reverse flow.

Construction and Configuration

Both ends use matching union connections. The internal check mechanism prevents reverse flow. Confirm the flow direction before installation.

Key Data

Model	Size	Rated working pressure
DXF70、 DXF105	2"×2"、 3"×3"	70、 105 MPa

Selection

Specify the bore, rated pressure, fluid, temperature and end-connection model.
